EDUCATION

Washington University in St. Louis

Bachelor of Science

Major: Computer Science & Business | **Minor:** Mathematics

GPA: 3.88/4.00 | Dean's List

Scholarships: Annika Rodriguez Scholar

May 2028

St. Louis, MO

EXPERIENCE

World Wide Technology

Incoming Solutions Engineer

May 2026 – Aug 2026

St. Louis, MO

- Will support client engagements within the services organization by shadowing client-facing engineers during technical discussions and solution design sessions.
- Will contribute to supervised delivery tasks by breaking down and executing assigned components of larger service engagements.
- Will work within the emerging security services domain, assisting with research on new technologies, architectures, and security best practices.

AutoDesk

Tech Intern

Jun 2025 - Jul 2025

San Francisco, CA

- Supported the Fusion 360 team by helping improve internal tooling for design validation workflows. I worked with a small team of engineers to streamline part of the process used to test CAD model compatibility across different modules of the software
- This project helped reduce manual testing time and improved the reliability of a key validation step in the development cycle. Used Python, Fusion 360 API, Git, Jira, internal Autodesk testing frameworks during my time there

Venture Starters

Market Researcher Intern

Jan 2025 - Apr 2025

Remote

- Led startup analysis team, analyzing 250+ early-stage startup pitches across multiple sectors and presenting the top 3 investment opportunities to partners with projected IRRs > 20%.
- Conducted comprehensive due diligence on 13 high-potential ventures in fintech and healthcare verticals, delivering actionable investment memos that informed portfolio allocation decisions

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Handshake AI Research Fellowship

AI Researcher

Nov 2025 - Present

Remote

- Working for Project Hedgehog in developing and fine-tuning generative AI models for social media content creation.
- Trained and analyzed models to identify cross-platform viral content patterns, leveraging performance data to inform model iteration, feature selection, and prompt optimization.

Washington University in St. Louis Student Investment Fund

Senior Analyst

Aug 2024 - Present

St. Louis, MO

- Co-manage a \$250K portfolio, focusing on Technology, Media, and Telecommunications(TMT) & Consumer, conducting technical analysis, market research, risk assessments, and building valuation models to inform investment decisions.
- Pitched long positions in ON Holding and Expedia Group to the investment committee, presenting comprehensive equity research reports with DCF models, comparable company analysis, and risk-adjusted return projections.

PROJECTS

ESG Signal Scoring Pipeline for Public Equities

Python | NLP | Transformers | Scikit-learn | Streamlit

- Developed a data pipeline to evaluate ESG performance by extracting and analyzing unstructured text from sustainability reports, financial news, and social media. Used transformer-based NLP models to quantify sentiment across environmental, social, and governance dimensions. Applied anomaly detection to flag potential greenwashing behavior

AI Receipt Saver - Personal Expense & Purchase Tracker

React Native | Expo | OCR | Supabase

- Built a mobile application to streamline receipt management and track individual purchase history. Integrated OCR (Optical Character Recognition) to extract and categorize line-item data from physical receipts. Utilized Supabase for real-time data storage, user authentication, and syncing across devices

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML, CSS, C++, R

Developer Tools: AWS, Postman, Git, Docker, Prism, Supabase, Render, Firebase

Libraries/Frameworks: Spring Boot, React.js, Next.js, Node.js, PostgreSQL, Vue.js, Flask, React Native, TailwindCSS
